BKM Organic Pre-Cleaner

technical data sheet

Article-No.: 934266-01 1 Litre canister
Article-No.: 934269-01 5 Litre canister

Product description

Product advantages

The BKM Organic Pre-Cleaner is a highly effective agent to eliminate the negative effects of mould infestation safely and without harmful residues.
Simply apply and allow to act for 30 minutes.
The surface itself is not attacked and remains free of harmful ingredients.

Areas of application

The organic pre-cleaner can be used on all surfaces. Ideal for e.g. textiles, plaster, natural building materials or concrete.

- For damp rooms e.g. dairies, slaughterhouses, bakeries, breweries, bathrooms, kitchens, living rooms, bedrooms, cellars, etc.

Product application

Application

BKM Organic Cleaner is a ready-to-use mixture and can simply be sprayed on with a hand sprayer or applied with a sponge.
For large areas, we recommend an electric low-pressure sprayer.

For weak infestation

Apply BKM Organic Pre-Cleaner once generously. Depending on the absorbency of the substrate, use approx. 150 ml/m2. After a reaction time of approx. 30 minutes, clean the surface with clear water and a damp sponge or cloth.

In case of heavy infestation

Apply BKM Organic Pre-Cleaner once generously. Depending on the absorbency of the substrate, use approx. 150 ml/m^2.
After approx. 30 minutes, but before the Organic Pre-Cleaner has dried, the mould must be removed with a high-pressure cleaner or mechanically with e.g. a spatula.
Then apply a second coat of Organic Pre-Cleaner, repeating the above steps.
The total consumption for two applications is approx. 300ml/m^2.

Further treatment

After drying, the surface is free of spores and should be treated with BKM Organic mould protection within 24 hours to prevent renewed mould infestation.
